

BEECHWORTH  WINDOWS™

Now, open.

A breath of fresh air.

Our approach is centered on simplicity. So our focus is, of course, to make your experience as simple as possible.

We've put in the time to bring you the best options possible, and each will deliver on our promise to give you the kind of window products that truly perform—without compromising aesthetics.

From the time you open this brochure to the day you first open that new window, we hope you'll have just one word for your experience with Beechworth Windows:

refreshing.

What's inside matters most.

It's all about composition. For a replacement window, understanding the long-term value of the material and the components that make up the final product is important—and it will help you make the smartest decision.

Strength

- Superior in strength to vinyl
- High strength prevents unsightly sagging and windows from sticking
- Shape and structure holds over time

Durability

- Higher resistance to warping, rotting, cracking
- Extreme resistance to deterioration
- Much greater dimensional stability than vinyl

Efficiency

- Lower heat and cold conductivity than aluminum material
- Glass packages are designed for maximum comfort
- Extremely low air infiltration for higher efficiency, more comfort, and lower energy bills

Aesthetics

- High-quality, premium finishes
- Interior finishes paintable or stainable
- Finishes complement James Hardie® ColorPlus® Technology finishes

Fiberglass is:

- A combination of glass, resin and performance technology
- Lightweight and extremely strong
- Used in windows since the 1980s

Let's window shop.

An inspired approach.

You've got a vision. But consider the particulars of your home first. When was it built? What is its style? Are you looking to make your windows an enhancement of the exterior, or a subtle finishing touch? And that's just the look. There's still so much more to think about. Below are some guidelines to help you consider all the factors.

- Are interior rooms consistently comfortable?
- Do you feel drafts or cool air around the windows?
- Are you hoping these new windows will establish a different look, or simply serve as replacements?
- Do you see cracks, rot or deteriorating wood around your existing windows?
- Is it difficult to open or close your windows?
- Do you see fog or condensation on your windows?

These initial guidelines should bring you to the ideal combination of windows and accessories—the ones that will

bring your vision to life.

A simplified process.

Choose Windows

It starts with form and function. So the first step is to browse types and shapes of windows.

See pages 6 - 10

Choose Finishes

Go natural, or choose exterior and interior finishes that suit your style.

See page 11

Choose Glass, Grilles and Hardware

Whether you choose something standard or standout, small design details can make a big impact.

See pages 12-13

Simple, isn't it?

Once you're happy with your selection, contact us and we'll coordinate your next steps.

Double-Hungs

The world, at your fingertips.

The most popular style of window today, these double-hungs are manufactured to Beechworth's superior quality standards.

FEATURES

Water stays away from the interior, thanks to a true sloped sill

Surface-mounted lock and keeper provide that traditional look

Tilt latches allow easy cleaning

Casements

See how well things can turn out.

Perfect for those hard-to-reach spots, Casements give you uninterrupted views and maximum airflow, with a single handle that tucks away nicely.

FEATURES

Quality crafted, with sash secured in multiple locations

Easy-open handle with an unobtrusive design so it blends into the window

Superior Durability

Lower maintenance is the benefit of a Beechworth window over a wood window. Fiberglass has a much lower rate of expansion and contraction, and it won't absorb water as wood does. Another benefit is that it will move significantly less with exposure to temperature changes than you could see with vinyl windows. This protects the integrity of the window aesthetic and its finish, and prevents added repair costs.

Superior Strength

Beechworth™ products resist sagging and twisting—a common symptom of worn vinyl windows. The composition of the material is extremely strong, so it withstands the effects of seasonal changes. The material will also, with exposure to temperature changes, move significantly less than vinyl windows.

Awnings

It's time to raise your glass.

Awnings open from the bottom, and are ideal for letting air in regardless of the weather outside.

FEATURES

Simulated Divided Lite (SDL) pattern in Colonial adds additional charm

Full side-to-side ventilation

Scissor arm for smooth, soft open and close

Refined Aesthetics

Enhance the look of any window with exterior finishes that complement your cladding, or experiment with grilles for a subtle and enriching impact.

Picture Windows

A picture is worth a thousand words. (Like, "Wow.")

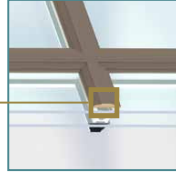

Most often used as accents, these are also commonly combined with other window types for dimension and diversity.

FEATURES

Add visual interest with picture windows in gables or sunrooms

Add interior or exterior grilles to further customize your picture windows

Evaluate Efficiency

On average, 15-20% of a home's walls are glass from windows, so there is value in a proper glass treatment. All Beechworth Glass Packages have low-E coatings, argon gas and a warm edge spacer between panes for maximum thermal efficiency.

Sliders

Open wide and say, "Ahh."

Great for areas that require lots of air and light. Sliders tend to be opened and reopened the most often, so reliable function is important.

FEATURES

Slider Window

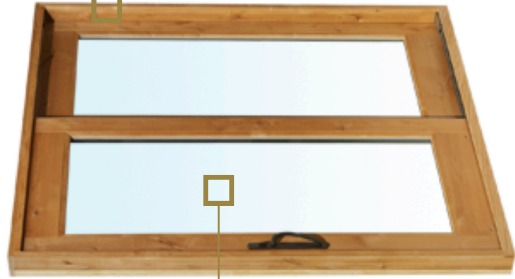

Quiet, smooth, horizontal sliding with nylon rollers

Easy to clean with inward-tilting sash

Slider Door

Easy to clean and operate

Outstanding thermal performance, specifically designed for larger exposure to the outdoors

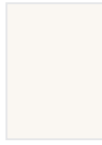

Finishes

Do more—with less.

An approachable palette of interior and exterior finishes allows for just the right amount of options. These finishes have been carefully considered, to offer you design flexibility without becoming overwhelming. Plus, each comes with a 15-year limited warranty.

Exterior Finishes

Beechworth™ Finishes in light and dark colors resist peeling and cracking, so windows retain a premium look over time.

Frost White

Sand Beige

Ever Green

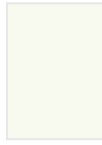

Brickroad Red

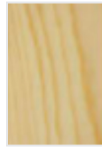

Tudor Bronze

Interior Finishes

Provide a warm, authentic look to the interior of your home—with options machined from solid wood.

Finished White

Primed

Glass, Grilles and Hardware

The difference is as clear as day.

Designed for comfort. Engineered for efficiency. Beechworth™ Glass Packages come with above-average features...a big improvement over single-pane or uncoated products.

FEATURES

To determine thermal efficiency, here are a few simple things to look for in your glass:

- Low-E coatings and two panes reduce the movement of heat energy through the glass to the inside of your home
- Argon gas between the panes slows heat loss for more stable temperatures in the home
- Our spacers carry less of the heat or cold to the outside of your home, reducing condensation

Options for tempered and obscured available

Give your home a façade lift.

Beechworth™ Grilles

Beechworth™ Grilles and grille patterns add depth, dimension and noticeable character to windows in a way that can affect the entire look of the home—from the inside and outside.

SDL (Simulated Divided Lite):

- Achieve the authentic wood look with grilles that adhere to the exterior glass panes.
- Finished to match the window finish
- Architectural style enhances your home's charm

GBG (Grille Between Glass):

- Grilles contained within the glass give windows an added bit of visual interest.
- Finished to match your exterior
- Choose between flat and sculptured

Grille Patterns

Rectangular

6-Lite Prairie

9-Lite Prairie

Beechworth™ Hardware

Choose from four finishes—the best of the best—for your Beechworth Windows. All are durable, all-metal designs warranted for 15 years.

White

Tan

Brushed Nickel

Rustic Bronze

And of course, we didn't forget the screen.

Standard on all Beechworth Windows is our high-visibility screen.

This premium screen offers clearer views compared to traditional screens.

Beechworth™ Glass Packages*

Beechworth Glass has an edge on the competition, providing maximum comfort in both warm and cold temperatures.

| | STANDARD | ADVANCED | MAX | |
|---------------------------|--|---------------------------|-------------------------------------|---|
| Low-E Coatings | 2 soft (resistance to heat lost through radiation) | 3 soft (added resistance) | 3 soft, 1 hard (extreme resistance) | Coatings reduce the movement of heat energy to inside of the home |
| Includes Argon Gas | Yes | Yes | Yes | Reduces the movement of heat between interior and exterior temperatures |
| Visible Light | High | Medium | Medium | Lower visible transmission indicates that less light will affect (fade, discolor) interior furnishings |
| U-Factor | Low | Lower | Lowest | U-Factor is the measure of the flow of heat through a window. The lower the U-Factor, the better the insulation |
| Condensation | Low | Low | Low | Indicates possibility of condensation |

*All of our glass options are ENERGY STAR Rated

A window of opportunity.

Getting started with Beechworth Windows.

At Beechworth, we work with the best selection of replacement contractors so you're fully supported—whether you're looking for product information, an estimate, or a good evaluation of your home's existing windows.
